Communication
e. g. via Zoom

70 – 90 min.

The game is an online escape game with varied team tasks.
The teams have to solve an exciting murder case.
The players only need a PC or laptop with an internet connection.

Simple login with
a code

Teams of 3-6
persons

Web browser game for
PC or Laptop

THE STORY

An alleged murder in a mansion, closed investigations and a desperate family asking for clarification. The new detective John has talent but not a lot of practice. Can you help him? But be careful: the mansion is coming with some surprises while you're trying to find the answer in this unusual case.

HOW IT WORKS

Invitation to the event

The invitation is sent a few days in advance, ideally with a link to the preferred communication tool.

This is for example: ZoomPro, Microsoft Teams: Here the host can divide all players into groups to ensure team communication. The game itself works via a separate link in the browser.

The Event

All players have joined together. You start with your programme (e.g. speech by CEO, moderator or mascot 😊). Maybe some areas would like to introduce themselves. You create your agenda individually.

The Game

You will receive the link to the game with code from us in advance. Both can be sent now or shortly before the event begins. After your "preliminary programme" the teams will be sent to the separate "rooms".

After the game

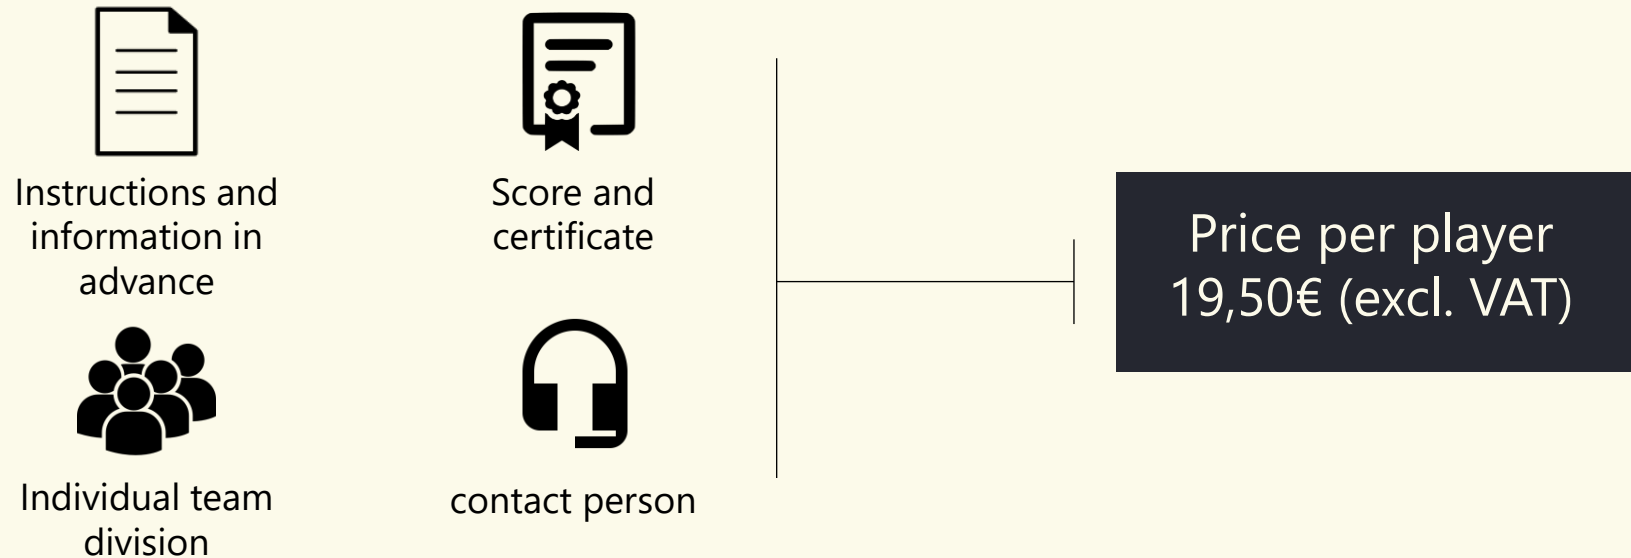

e.g. at the end / at a defined time everyone meets again together in a "room" for an award ceremony or a common toast / goodbye into the Christmas season.

Important:

- Headphones are required (for a nice playing volume at 30%,)
- Laptop or PC with webcam (no mobile phone or tablet)
- a good internet connection
- We recommend Chrome or Firefox
- close all other browser tabs and applications
- quiet area
- Pen and paper

SERVICE AND PRICE

Other functions and services included:

SERVICE AND PRICE

Optional extras:

Integration of a video as intro
Script from us for personalised introduction
Integration of a video after the game
